

Chameleon Writing Projection Board

- Specifications -

An achievement of (enormous) proportions

In large rooms, legibility can be a problem. This Chameleon Projection Board provides an oversized projection surface of 88 or 100 inches (16:10 proportion). In combination with the modern generation of projectors, this produces amazing image quality. The frameless board fits perfectly in any interior. Combine the digital projection board with the Chameleon Writing Extension Board (left panel) in the same height. The combination with this writing board boosts cooperation and creativity in meetings and brainstorming sessions.
